

\$martest & Fastest Way To Pick Winning 4Ds

The \$mart Analyst with \$mart Advisor

This is a two-step method, using the **\$mart Analyst** and the **\$mart Advisor** of the 4D SuperEase Plus Professional software.

Step 1 - The **\$mart Analyst** lists the top 4D numbers according to frequency.

Step 2- The **\$mart Advisor** ranks the top numbers by Overall Stars rating, from 0 to 9, 9 being the highest. The rating is based on nine factors. Each factor, when it is met, is given a Star. Hence, when all the nine factors are met, the number will be given 9 stars. The number with the highest Star rating is automatically ranked on top of the list.

Generally, a number with a higher Star rating is preferred than one with a lower Star rating.

From my observation, I note that numbers with overall higher Star rating (ie., 4 Stars or above), are more likely to be drawn earlier. Usually, they have a better chance in hitting a prize, than a number with a lower Star rating.

A word of caution though, it does not mean that number with 9 Stars would surely be drawn earlier than a number with 1 Star rating.

At times, you may find that numbers with lower Star rating may be drawn ahead of numbers with higher Star rating. Lower Star rated numbers may even hit Top-3 prizes. This is the nature of randomly drawn numbers as in the 4D lottery. Anything can or will happen. So be aware of this reality.

In the next page, \$mart Advisor lists the Top 18 numbers of ABCD and AABC (as at 10 January 2012). Look out for those numbers with 7 Stars and above.
