

Web-based 4D-Toto Forecast Apps

*Soon you will be able to have
4-D Master's 4D & Toto Forecast apps
on your mobile and other devices ...*

Initially, I thought of developing 4D & Toto apps targeted at Android and iOS smart phone users. However, these apps will only benefit a small group of our customers with these smart phones.

As a result of valuable feedback from our readers, I have decided to develop web-based apps so that as many users can also access these apps with different devices. The web-based apps can be accessed by smart phones, Pdas, tablets, netbooks, notebooks, PCs, Macs, smart TVs and any other devices that have internet connection. Isn't this wonderful?

For a start, I have developed an web-based app on Lucky Stars 4D Forecast. This app is now available on free trial. Later, more 4D and Toto apps will be developed.

If U are interested for the free trial, please register:

<http://winforever.net/apps/trial-apps.htm>

Upon registration, U will get an immediate email on how to access the link to the web-based app. If U do not get the email in your Inbox, check your JunkMail box, it may land up there.

For those who already registered earlier, U need not register again.

Have fun and enjoy. Huat ah!
